

KIRAMAT ULLAH

Backend Engineer | .NET 8 / .NET 10 | PostgreSQL | Microservices | AI-Assisted Delivery

Islamabad, Pakistan | +92 314 515 6620 | kiramatdev@gmail.com | <https://www.linkedin.com/in/kiramat-ullah-3a304223b>

PROFESSIONAL SUMMARY

Backend-focused Full Stack .NET Engineer with 3+ years of experience building secure, scalable, and data-intensive applications across ASP.NET Core (.NET 8 and .NET 10), React/Angular, PostgreSQL, and SQL Server. Experienced in backend service design, API development, database schema and query optimization, microservices, authentication/authorization, and large-scale data processing. Contributed to a government-level biometric platform handling 40+ million records and to production systems where performance, reliability, and maintainability are critical. Comfortable translating product requirements into technical solutions and using AI-assisted engineering workflows for research, implementation, debugging, and review.

CORE EXPERTISE

Backend Architecture & Ownership • ASP.NET Core / .NET 8 / .NET 10 • REST APIs • Microservices • PostgreSQL • SQL Optimization • Database Design • Docker • JWT / RBAC / PKI • React / Angular • JavaScript / TypeScript • Git • SignalR • Large-Scale Data Processing • Performance & Reliability • AI-Assisted Development

PROFESSIONAL EXPERIENCE

C# .NET & WPF Developer | TechoStudios Pvt Ltd

Apr 2025 - Present

Islamabad, Pakistan

- Develop and maintain scalable backend services using ASP.NET Core, with ownership across API behavior, business logic, data access, and production-facing workflows.
- Design and evolve database schemas and SQL queries, focusing on maintainability, data integrity, query performance, and reliable application behavior.
- Build and maintain REST APIs for enterprise applications and integrate backend services with desktop and web clients.
- Work with large datasets and optimize backend/data-processing paths to improve system efficiency and responsiveness.
- Contribute to technical problem solving, implementation planning, debugging, code quality, and iterative delivery in an Agile environment.

C# .NET & React Developer | Datagonomix / 1Journey.ai Pvt Ltd

Jan 2024 - Apr 2025

- Developed full-stack applications using ASP.NET Core and React, taking features from backend API implementation through frontend integration.
- Built RESTful APIs and implemented reliable data flows between application layers and relational databases.
- Optimized database queries and backend logic to improve performance and maintainability.
- Collaborated on production features, bug resolution, and iterative delivery across frontend and backend components.

C# .NET & Angular Developer (Intern) | Arhpez Technologies Pvt Ltd

Jul 2023 - Jan 2024

Islamabad, Pakistan

- Contributed to ASP.NET Core and Angular applications, including backend logic, API work, and database design.
- Supported feature implementation, debugging, and team-based delivery in a structured development environment.

SELECTED ENGINEERING PROJECTS

AABIS - Automated Biometric Identification System | Government-Level Project

- Contributed to a government-level biometric platform handling 40+ million fingerprint, face, iris, and palm records.
- Developed legacy-data migration pipelines, including EFT extraction, transformation, validation, and integration into modern workflows.

- Built microservices and high-performance .NET 8 APIs for bulk ingestion and search-oriented workflows, with PostgreSQL data modeling and query optimization.
- Implemented JWT, RBAC, and PKI security patterns and contributed to performance, reliability, and production-readiness improvements.

AI Video Detection Platform | *Personal Engineering Project (Completed)*

- Developed a multi-service AI video analysis platform using ASP.NET Core on .NET 10, React with TypeScript, Python FastAPI, PostgreSQL, Hangfire, and FFmpeg.
- Designed asynchronous processing for large video uploads, background analysis, progress tracking, retry/cancel flows, failure handling, and long-running job reliability.
- Integrated AI inference workflows with persisted analysis results and evidence, while keeping service boundaries clear between web API, worker, storage, and AI components.
- Implemented engineering safeguards around timeouts, job state, processing stages, and recovery behavior to reduce stuck or duplicate processing.

Interior Hospital Management System | *Academic Web Project*

- Developed a multi-dashboard hospital management system covering admin, doctors, patients, and pharmacy workflows.
- Implemented appointment scheduling, record management, and role-oriented application modules.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Gomal University, Pakistan

CGPA: 3.61 / 4.00

2019 - 2023

TECHNICAL SKILLS

- Languages:** C#, JavaScript, TypeScript
- Backend:** ASP.NET Core (.NET 8, .NET 10), ASP.NET MVC, REST APIs, Microservices, Background Processing
- Frontend:** React.js, Angular, WPF, MVVM
- Databases:** PostgreSQL, SQL Server, MySQL; schema design, query optimization, relational data modeling
- Security:** JWT Authentication, RBAC, PKI Integration
- Tools & Delivery:** Docker, Git, SignalR, Hangfire, FFmpeg, Keycloak, Agile, AI-assisted development workflows
- Languages:** English (Fluent), Urdu (Native)
